

inter-office memo

TO: John Powers

FROM: Steve Bristow 

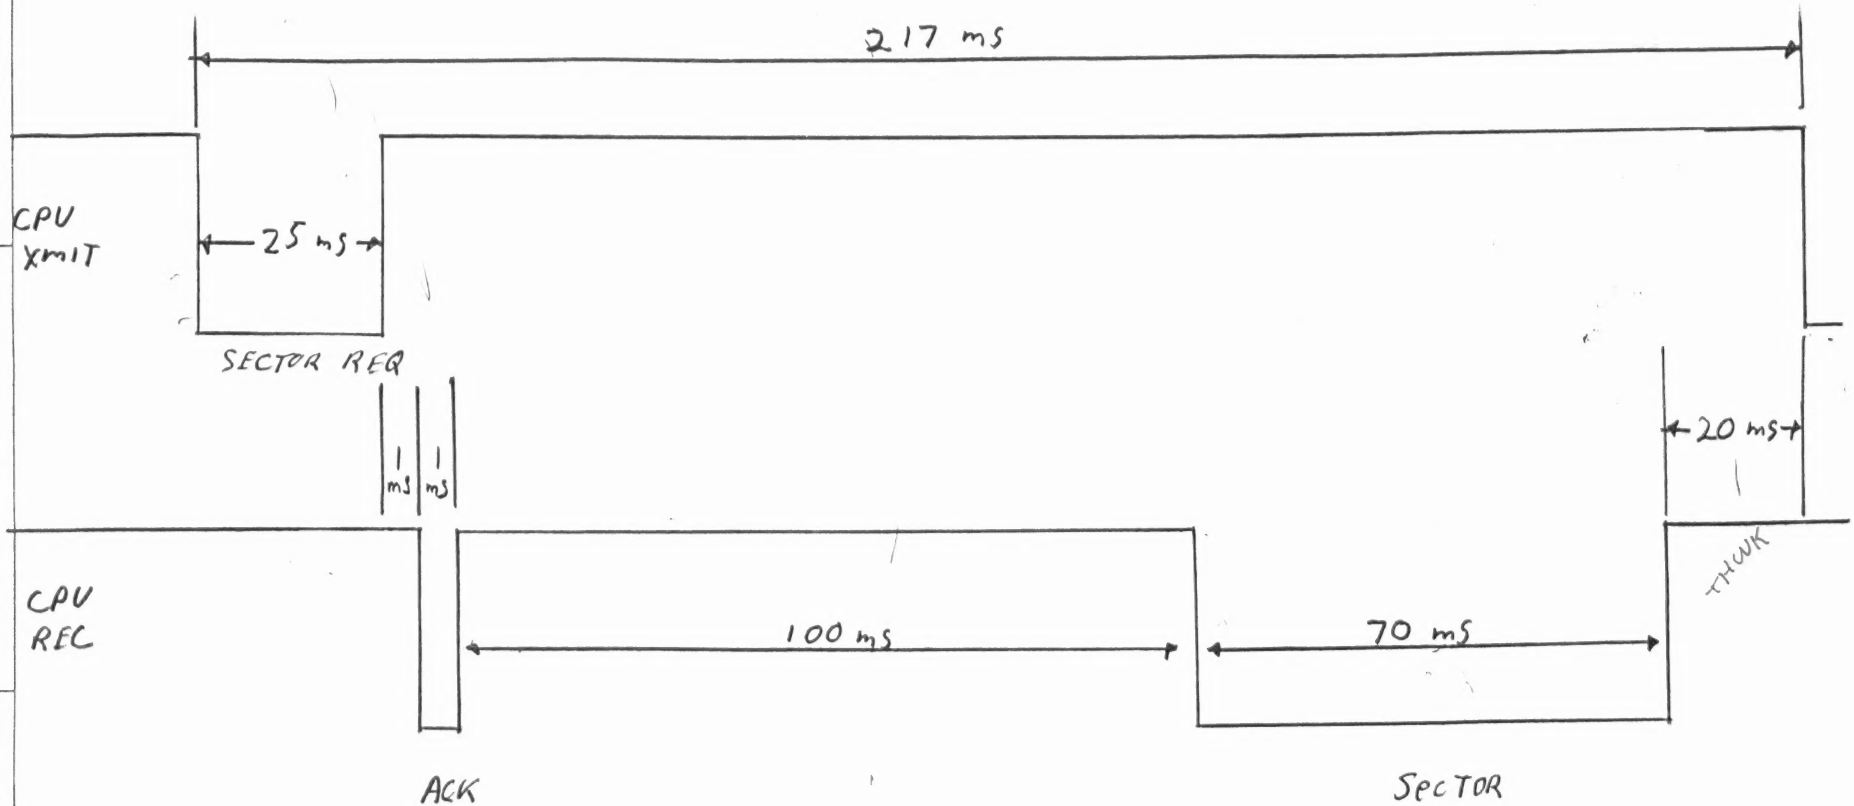

SUBJECT: 12/15/80 disk drive manual by Harry Stewart

DATE: 1/22/81

1. P.O we plan on phasing in Tandon in addition to MPI. 2.1 should be expanded.
2. We've had various RPM'S for the drive motor spec'd. It always has not been just one value 2.5.2.
3. As this manual includes spec's on parts that we don't control (MPI, 177V, PIA, etc. I assume that it is for internal use only).
